

**aerpointfans**<sup>™</sup>  
epitome of luxury fans

PRODUCT CATALOG 2023

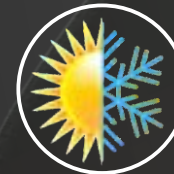

Aerpointfans offer fans with 3 stage air purification solutions, first in its class in India, with an add on function of formaldehyde removal.

Aerpointfans BLDC motors are silent and consume 70% less power than AC motor fans

The speed of the fan varies automatically according to the temperature of the environment.

These fans have the functionality to provide cool breeze throughout the year with the mechanism of clockwise and anti clockwise feature.

Aerpointfans can customise the color as per any shade you require.

These fans rotate 60, 90, 180 & 360 degrees thereby ensuring the air is circulated throughout the room

You can switch between white, warm white and yellow at the touch of a button

The fans run intermittently between high and low speed so that you can feel the comfort of the breeze.

You can adjust the intensity of the light between 3000K to 6000K to set the perfect ambience as per your mood

These fans rotate horizontally and vertically by ensuring that the air is circulated evenly throughout the room.

# Smart Fan

Control your fan with multiple device

It works via Remote

It works with WiFi

Compatible with Alexa,  
Google & Siri

Download App : Tuya

## Flatback to be used for top Crystals

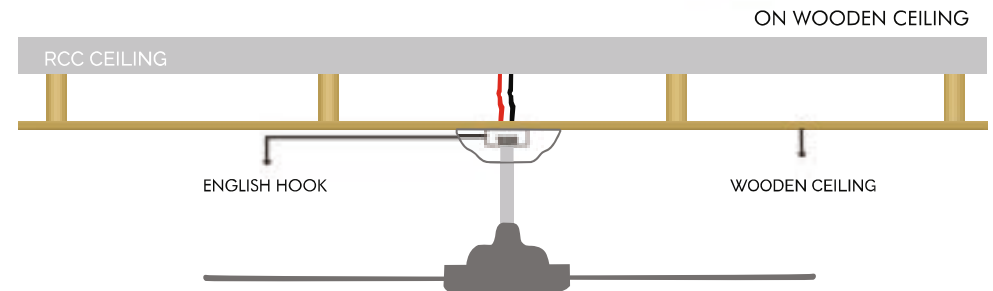

## Bottom pendants to be used for the tip

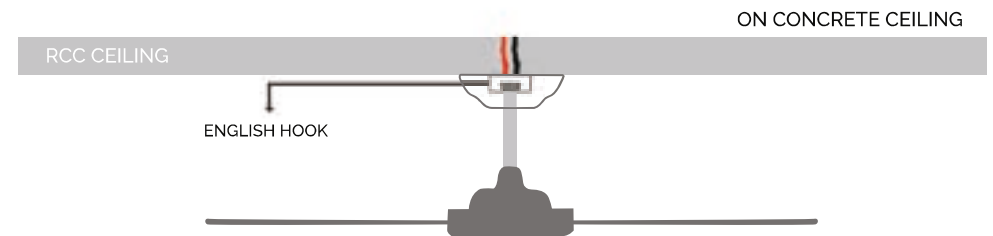

## INSTALLATION PROCEDURE FOR ENGLISH HOOK

Fix a wooden box between the RCC and false ceiling, secure the box on the RCC ceiling with fasteners. Install the false ceiling touching the base of the false ceiling.  
Fix the fan on the false ceiling with screws, these screws will fix firmly on the wooden box, taking the entire weight of the fan.  
**Kindly note :** Our controller will sit in the fan cup on the top, hence preinstalled rod cannot be used to fix these fans.

Our fans can be directly installed on wooden ceilings. A wooden ceiling of minimum 12mm plywood is required. Make sure the wooden ceiling is strong enough to take the weight of the fan.

Our fans can be directly installed on a concrete ceiling. It is recommended to use the original download and mounting kit provided along with the fan.

## How to choose your ceiling fan

 <p><b>&lt;90</b> SQ.FT OR LESS</p>	 <p><b>90-100</b> SQ.FT</p>	 <p><b>100-150</b> SQ.FT</p>	 <p><b>&gt;150</b> SQ.FT OR LESS</p>
